DÉLICE

Fruit-forward sweetness

Chips

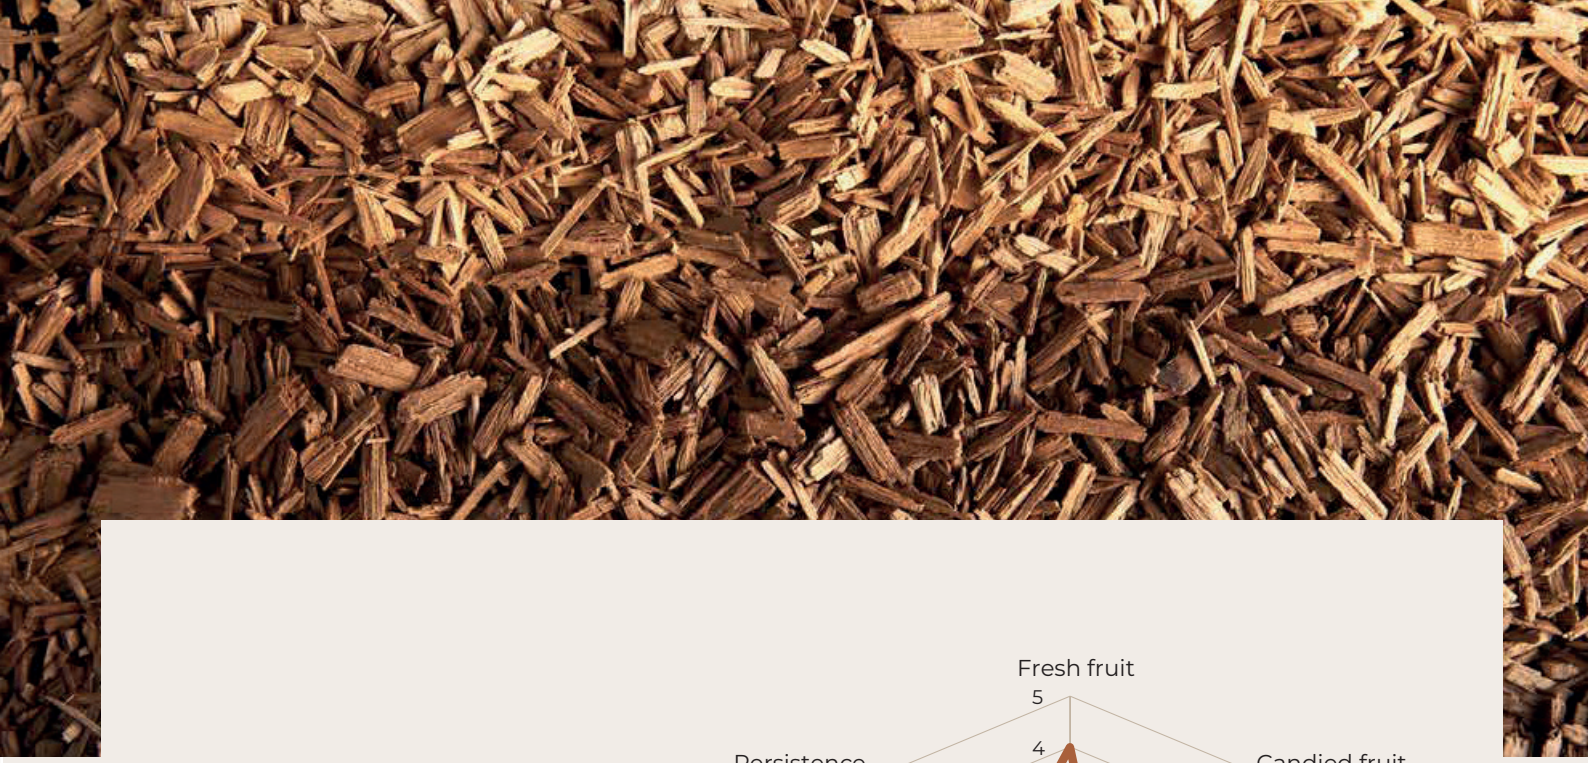

DESCRIPTION

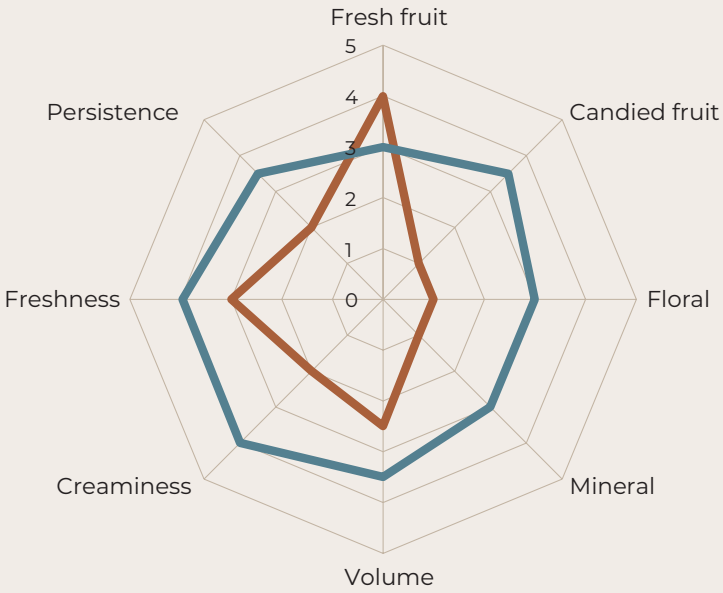

DÉLICE is designed for rosé wines in the Côtes de Provence style, where roundness and freshness are sought, with stone-fruit notes such as white peach and apricot, and a very light veil of vanilla. This universe is intended for wines that are released early to market: rosés, light and fruity reds (Merlot, Sangiovese…) or early-release wines (crunchy, juicy Syrah or Gamay).

The role of DÉLICE is to mature the fruit and wrap wines that may sometimes lack volume, bringing creamy mid-palate sweetness reminiscent of lees, which imparts the characteristic richness of Provençal rosés. DÉLICE always remains respectful of the fruit, and of the delicate, floral character of these targeted wines.

The DÉLICE universe was designed specifically for use in chip form, suitable for wines intended for rapid consumption.

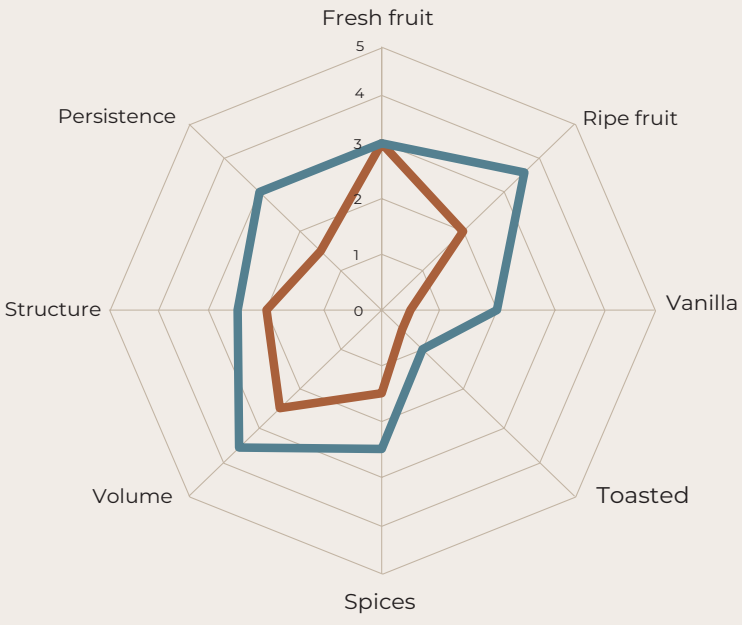

Saveurs
Chêne pour l'œnologie Saury

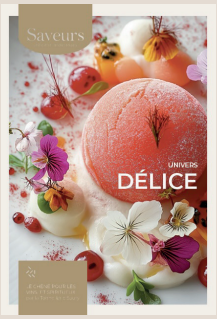

ROSE CINSAULT / GRENACHE
12.5% vol.

— Rosé Cinsault / Grenache control sample
— Chips AF 2g/L
